

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?

Does

What behavior have we observed?
What can we imagine them doing?

India is the second largest producer of wheat and rice ,the World major food staples.

The agriculture sector employs nearly half of the workforce in the country. However it contributes to 17.5% of GDP (at current prices in 2015 - 16)

The history of agriculture in India dates back to the Neolithic period.

It provides employment opportunities to the rural agricultural as well as non agricultural labours.

Agriculture growth has been fairly volatile over the past decade, ranging from 5.8% in 2005-2006 to 0.4% in 2009-2010 and -0.2% in 2014-2015.

A way of grouping continuous data into discrete categories are bins in tableau.

Agriculture is the main source of income for major part of our country's population.

It ensures the country food security and produce a variety of industrial raw materials.

It provides food,raw material for industries and product for export.

Indian agriculture began by 9000 BCE on North-West India with the early cultivation of plants and domestication of crops and animals.

Agriculture is the mainstay of Indian economy because about 60% of our population depends directly or indirectly on agriculture.
